

Franck Loic

United States, 5712955326, job@hirefranck.com

PROFILE

Certified AWS Solutions Architect and product manager with expertise in AI/automation, delivering user-centric products that drive business value and customer success.

EMPLOYMENT HISTORY

Jan 2023 — Present

Senior Product Manager, FrontlineGig.com

- Defined product mission, vision, and strategy, aligning business goals with customer needs.
- Set key success metrics and prioritized projects to drive impact.
- Led cross-functional teams and external partnerships (Dream.org, AWS, Chesapeake Bay Trust, etc.).
- Conducted 100+ user interviews and implemented feedback-driven improvements.
- Directed software development and design, managing both strategy and execution.
- Built and deployed AI chatbots using Voiceflow, driving customer engagement and reducing support overhead.
- Prototyped key product features with Cursor and Lovable that directly contributed to sales conversions.
- Designed Make.com automations for data collection, streamlining job-matching model training and improving customer engagement workflows.

Nov 2018 — Dec 2022

Product Manager, Freelance/Contractor, HireFranck.com

- Chptr: Defined product strategy around key user segments and set the initial product roadmap through ProductBoard. Led the design through Figma and Jira. Launched the beta app across iOS/Android using Flutter. Identified and tracked key metrics through Firebase, performed user testing, and presented findings and recommendations in weekly product meetings using PowerPoint. [2021-2022]
- CrossRiverBank: Helped service 5k+ PPP Loans through Zendesk and Salesforce in a customer success capacity. Quickly learned complex financial processes to serve customers. [2020-2021]
- Travelaya: Utilized agile methodologies to lead product development from idea to launch, managing a remote team and coordinating with vendors for the subscription-based hotel discount app. [2019-2021]

Nov 2015 — Nov 2018

Mobile Product Manager, Dominion Enterprises

Norfolk

- Launched Commute Time and School Ratings features, increasing retention, session time, and sessions per user by 10%+. Analyzed user behavior data in Adobe Analytics to identify areas for improvement.
- First PM on Trader's mobile team. Led the successful re-launch of all 10 mobile apps across iOS and Android. iOS and Android app ratings moved from an average of 1.5 stars to 4+ by analyzing user feedback to find areas of improvement. Monthly active users grew from 110k to 150k+.
- Validated product assumptions to ensure that the mobile apps meet the needs and expectations of users from various verticals, which came down to the frictionless purchase or sale of a vehicle.
- Analyzed user data and feedback to inform product decisions and prioritization through qualitative (user testing, forms, weekly meetings) and quantitative (Adobe/Google/App Analytics, etc.) means.
- Worked with designers, engineers, and data scientists to build and launch new features and functionality for the mobile apps. Prototyped features through Sketch, Balsamiq, and Invision.
- Tracked and analyzed key performance metrics (e.g., usage, retention, conversion) to inform product decisions and optimize the user experience.

Jan 2015 — Dec 2017

Product Manager and Founder, Rocket Science Web Studio

Norfolk

- Built end-to-end products for entrepreneurs and businesses, generating \$200k+ in revenue.
 - Led product, marketing, support, and sales efforts, generating 100+ leads.
 - Sourced and vetted freelance resources to complete 20+ projects on time and on budget.
-
